

William H. Mitchell, Jr.

President, LSP

bill@cleansoils.com

Professional Qualifications

Mr. Mitchell, a co-founder of Clean Soils Environmental, Ltd. (CSE), is an experienced Licensed Site Professional (LSP) and geologist having over 25 years of environmental consulting and remediation projects throughout New England. As one of the first LSP's to receive licensing, Mr. Mitchell has implemented remedial technologies and closed out numerous projects in accordance with the Massachusetts Contingency Plan (MCP) since its conception in 1993. These projects are primarily for commercial and industrial facilities to address oil and hazardous materials releases to soil, groundwater and indoor air. His wide range of environmental knowledge and experience bring an interdisciplinary approach to solving environmental problems. Mr. Mitchell is also renowned for his work with homeowners who have experienced an oil or hazardous material release, regardless of whether insurance coverage is available.

Mr. Mitchell has conducted numerous subsurface investigations, environmental site assessments, and remedial activities associated with underground storage tank systems and releases of hazardous substances. Experience associated with these studies include; site characterization, risk assessment, and assessments of environmental impact to groundwater, soil, indoor-air, wetlands, waterways, and sediment. Mr. Mitchell offers his expertise and provides guidance regarding hazardous waste management, regulatory guidance/compliance, treatment systems, client education, wetlands assessment, and waterways restoration.
