

**John Erik Strom**  
Environmental Geologist  
[johnerik@cleansoils.com](mailto:johnerik@cleansoils.com)

## **Professional Qualifications**

---

John Erik Strom is the newest member of our team and works directly with the Project Manager and Licensed Site Professional (LSP) at Clean Soils Environmental, Ltd. (CSE). He supports field investigations involving real estate due diligence services including Phase I & II Environmental Site Assessments consistent with ASTM and Massachusetts 21E standards, in addition to preliminary and comprehensive assessments and remediation activities for Massachusetts Contingency Plan (MCP) projects.

A graduate of Salem State University (SSU), he holds a bachelor's degree in Geological Sciences with a concentration in Marine Geology. Prior experiences include work with The National Science Foundation, The National Lacustrine Research Facility (LaCore), Salem Sound Coast Watch and the Peabody Essex Museum/Historic New England. Strom's specific skillset includes soil sampling, sedimentary lab techniques, coring methods, use of ground penetrating radar, water quality monitoring, geophysical data collection/processing, report writing, and geologic mapping. John Erik's work and relationships with clients and colleagues' mirrors CSE's high standards of honesty and integrity. He places great value on working together to achieve common goals in a structured and safety-minded manner.
